Washington, D. C.

ANIMAL HUSBANDRY¹ PUBLICATIONS OF THE DEPARTMENT OF AGRICULTURE
CLASSIFIED FOR THE USE OF TEACHERS.

The following list of publications has been prepared to assist teachers in making an intelligent selection of Department publications on topics pertaining to the subject of animal husbandry. The publications now being issued consist of five series of bulletins and circulars; Farmers' Bulletins, which are written in non-technical style contain recommendations and directions for procedure in modern agricultural and home-making practices; Department Bulletins, which are technical discussions primarily of the results of experimental work of the Department; Department Circulars, which carry less technical and more informational contributions designed for scientific and limited mailing lists; Miscellaneous Circulars which are of a nature which do not fall in the other three classifications or which are of other than regular octavo size; and Statistical Bulletins. Yearbook Separates are reprints of articles appearing in the Yearbooks of the Department. Teachers should avoid requesting a large list of publications on different topics at one time, or of publications, the use of which is to be distributed over a long period of school work. It must be the policy of the Department to limit the distribution of publications to actual present needs as nearly as possible, so that the funds available for the purpose of publication can be made to benefit the largest possible number of real users. A few bulletins carefully studied by the teacher and the class or assigned to certain members for individual reports are of much greater service than a hundred forgotten on the shelves at home or in the school library. Copies of any of the publications listed below may be obtained free upon application to the Office of Publications of the U. S. Department of Agriculture as long as the Department's supply lasts. When the Department's supply is exhausted, they may then be obtained at the prices indicated from the Superintendent of Documents, Government Printing Office, Washington, D. C., to whom both postal order and remittance should be addressed as that office officially is not connected with the Department of Agriculture. Postage stamps, mutilated coins, foreign money and uncertified checks will not be accepted. No publications are sold by the Department of Agriculture.
